-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

Applicant's arguments filed 4/25/05 have been fully considered and are persuasive. Applicant cancelled claims 104 and 105. A new ground of rejection is set forth below.

#### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 52-54, 106-108 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kurobe (US 4853211; 08/01/89) and Greco (US 5084277). Kurobe teaches a method of applying a suppository comprising an effervescent plus a non-effervescent to the vagina. Kurobe teaches that his method is employed as a contraceptive. See abstract, column 3 lines 9-20, columns 5-6 examples 2-5. Kurobe does not teach that the method includes progesterone. However, Greco teaches a method wherein a suppository comprising progesterone is applied to the vagina. Greco also teaches that the suppository is in tablet form. See abstract, claims. It would have been obvious to one having ordinary skill in the art to include progesterone in Kurobe's contraceptive. One would have been motivated to do this since progesterone is a contraceptive. With respect to particle size of progesterone, one having ordinary skill in the art would have been expected to determine the optimum particle size. One would have been motivated to do this in order to develop the most effective contraceptive. With

respect to the method of preparing the tablet for vaginal delivery, the simple act of mixing and combining well-known chemicals provides no patentable weight to the invention. In order to overcome this rejection, Examiner suggests using "consisting essentially of" language in the instant claims.
